UTTAR PRADESH
STATE BRANCH

Chief Patron

Dr. Umesh Gautam
Chancellor, Invertis University

I am delighted to note that Pharmaneo-An International Conference on Drug Delivery System of Phytoconstituents-Past, Present & Future” is being organised by Invertis Institute of Pharmacy during February 17-18, 2017. I welcome all Delegates, Researchers, Academicians, Industry leaders, Hospital & Community Pharmacists to this conference and sincerely wish the two day deliberation will result in an outcome of great importance to the public in general and society at large.

I congratulate the organising members for taking all the initiatives to make this mega event a grand success. I urge them to make efforts to ensure that the Delegates attending the conference from all over the globe would commit themselves for the theme.

About University

It is India's first sanctuary to come under Project Tiger.

About Conference

Pharmaneo 2017

17th & 18th February, 2017

The International Conference (PHARMANEO) on “Drug Delivery System of Phytoconstituents - Past, Present & Future” provides an interdisciplinary forum for researchers and developers to present and discuss latest advancement in Phytopharmaceuticals as well as in delivery systems for phytoconstituents, in the wide and heterogeneous field of Medicine and Pharmacy in Health care. This conference will examine advancement in interdisciplinary sciences and novel strategy in isolation, purification and identification techniques for variety of novel herbal formulations like polymeric herbal nano-carriers, phytosomes, herbosomes, pro-niosomes, nano-emulsions, microsphere, transferosomes, implants and aims to bring together specialists for exchanging their ideas and promote fruitful discussions.

We also particularly welcome papers raising challenging questions, innovative ideas and out of the box thinking as a consequence, can help to promote interesting discussions at the conference.

Motivation Behind the Conference

Phytoconstituents are used by the human race since times immemorial for different ailments. But, they suffer limitations, which are mainly due to solubility&stability issues. Till today, the use of phytoconstituents is widespread in most of the world's population. In the modern world, herbal drugs are popular due to their ability to cure a variety of diseases with less toxic and better therapeutic effects, this not only attracts researchers but academicians also and research in this interdisciplinary field is gaining again widespread acceptance.

Objectives

This event will provide an opportunity to interact with scientist, researcher and academicians working in the area of herbal medicines & their delivery systems.

It will also give an exposure to budding scientist to understand the concept which is being prioritised throughout the world and will give an opportunity to identify real need to carry out research in the focused area. Conference will also discuss current research in the field to serve as references for researchers and provide perspectives for future research.
