Dear Dheeraj Ji,

CRC has lined up an Industrial visit for B.Com students at Calcom Vision Limited.

**Location: B-16, Site-C, Surajpur Industrial Area ,Greater Noida G.B. Nagar
(U.P)-201306**

Date & Time: Thursday, 25th Nov 2021 @ 11 AM

Total No of students 60 with two faculty.

This industrial visit will take 1.45 Hours for the exploration of students about the manufacturing process in a real time environment.

The industry will give significant knowledge & experience during this visit. We hope this visit will go through real time interaction and working environment. It will fill the gap between lessons and a practical working environment.

About Calcom Vision Ltd. <http://calcomindia.com/>

An Original designer and manufacturer (ODM), Calcom Group started its operations manufacturing Calculators in 1976. Within a few years we ventured into the manufacturing of Televisions. This expansion led to us becoming one of India's largest Television manufacturers with an annual volume touching 1 million TV sets per year, catering to leading brands such as Philips, Thomson, BPL, LG, Samsung etc.

Objective of Industrial visit–

1. Industrial visits provide the students with an opportunity to learn practically through interaction, working methods and employment practices.
2. It gives the students an exposure to current work practices as opposed to theoretical knowledge being taught at their college classrooms.
3. Industrial visits grant the students a great opportunity to interact with industries and know more about industrial environment.
4. Industrial visits are arranged by university for their respective students with an objective of providing them an opportunity to explore the different industry sectors like IT, manufacturing, services, finance and marketing.
5. Industrial visit helps students to combine their theoretical knowledge of business operations with the practical knowledge of its actual functioning.
6. Industrial realities are opened to the students through industrial visits.

Major Learnings-

Calcom's representatives guided the students. During the visit the students visited various production and manufacturing units. They were given a demonstration of both manual and machinery departments. Full-scale LED light manufacturing requires setting up of a large-scale factory set up with a complex process. They were guided about the process initiating from the step of pre processing of raw materials to mixing of raw materials, segregation, separation of samples and packaging.

LEDs have become an alternative light source to conventional incandescent and fluorescent Led bulbs. Initially the students visited the store of raw materials.. Then the students were briefed about the SMT process. Further the Manual insertions were made (resistance, location of designing). Then the students paid a visit on Assembling Section where interchangeable parts were added as semi-finished assembly in a series of batch production and the final assemble was done to procure finished goods. Then the manual packaging was done with 50 pieces per pack. Then the finished goods with defect were dispatched to rework area. In the other department was carried out with automatic technology. The synchronization of automatic and manual plant helped in employment maintenance. Overall the industrial visit supplemented and enhanced classroom learning and getting hands on technical knowledge.

Special Thanks

All students present their heartiest thanks to the university for giving them this opportunity

“The students were accompanied by faculty **Ms. Ruchi Rastogi** and **Mr. Manmohan Bansal**. Invertis University expresses deep gratitude to **Mr. Sushil Kumar (M.D.) (Calcom)** . Also it was possible due to sincere efforts of **Dean Management Dr. Manish Gupta** and **Dr. Dheeraj Gandhi (H.O.D.) (B.COM)**. Sincere thanks for providing a great opportunity to our students such an excellent industrial visit on behalf of **INVERTIS UNIVERSITY.**”
