

Name of the Cell/Department: Invertis University

Academic year: 2022-23

Name of Event: SAPLINGS FOR LIFE GROWTH

Date: 5 September 2022

Venue: Invertis University, Bareilly

Description: Invertis University organized an event on 'Saplings for life growth' for employees of university to plant saplings in the city where there are no trees. The objective of the event was to raise awareness about the importance of green environment in current living scenario. Due to increase in pollution the global warming in turn is affecting the environment to massive level. In order to bring about a significant change we need to motivate every individual to make this a part of their life. Without trees life is not possible, therefore the club has taken this initiative to motivate faculty and students to participate in this event. Students and faculty members participated in the event by planting 1000 saplings in city for new life growth thereby saving environment.
