

Evaluation Scheme & Syllabus

Of

Bachelor of (Hons.) Agriculture (I Year)

(w.e.f. Academic Session 2022-23)

Department of Agriculture

INVERTIS UNIVERSITY - INVERTIS VILLAGE

Bareilly-LucknowNH-24,Bareilly

Programme Outcomes of B.Sc. (Hons.) agriculture:

After completion of the program of B.Sc. in (Hons.) Agriculture, every student will know the following attributes:

PO1: Agriculture scenario of India and world.

PO2: They will know the crops, weeds, insect and diseases.

PO3: They will learn different resources both natural and artificial and their rational utilization

PO4: They will know seed to seed process i.e. production to marketing and value addition

PO5: They will learn marketing skill and commercial management of agricultural farms.

PO6: They will gain knowledge both on agriculture enterprises and related enterprises

PO7: They will have good communication skills and personality

PO8: They will be eligible to start their own agricultural based business or industries

PO9: They will have good knowledge of seeds and their production techniques

Discipline-wise Courses

S.No	Course Code	Course Title	Credit Hours
Agromony			
1.	BAG 106	Fundamentals of Agronomy	4(3+1)
3.	BAG 301	Crop Production Technology – I (<i>Kharif</i> crops)	2(1+1)
4.	BAG 409	Introductory Agro-meteorology & Climate Change	2(1+1)
5.	BAG 401	Crop Production Technology – II (<i>Rabi</i> crops)	2(1+1)
6.	BAG 407	Farming System & Sustainable Agriculture	1(1+0)
7.	BAG 591	Practical Crop Production - I (<i>Kharif</i> crops)	2(0+2)
8.	BAG 507	Geoinformatics and Nanotechnology and Precision Farming	2(1+1)
9.	BAG 010	Weed Management	3(2+1) *
10.	BAG 691	Practical Crop Production - II (<i>Rabi</i> crops)	2(0+2)
11.	BAG 607	Principles of Organic Farming	2(1+1)
12.	BAG 601	Rainfed Agriculture & Watershed Management	2(1+1)
13.	BAG 011	System Simulation and Agro-advisory	3(2+1) *
Plant Breeding & Genetics			
14.	BAG 201	Fundamentals of Genetics	3(2+1)
15.	BAG 302	Fundamentals of Plant Breeding	3(2+1)
16.	BAG 406	Principles of Seed Technology	3(1+2)
17.	BAG 003	Commercial Plant Breeding	3(1+2)*
18.	BAG 506	Crop Improvement-I (<i>Kharif</i> crops)	2(1+1)
19.	BAG606	Crop Improvement-II (<i>Rabi</i> crops)	2(1+1)
20.	BAG 008	Micro propagation Technologies	3(1+2)*
Soil Science & Agricultural Chemistry			
21.	BAG 103	Fundamentals of Soil Science	3(2+1)
22.	BAG 404	Problematic soils and their Management	2(2+0)
23.	BAG 502	Manures, Fertilizers and Soil Fertility Management	3(2+1)
Entomology			
24.	BAG 207	Fundamentals of Entomology	4(3+1)
26.	BAG 006	Biopesticides& Biofertilizers	3(2+1)*
27.	BAG 504	Pests of Crops and Stored Grain and their Management	3(2+1)
28.	BAG 605	Management of Beneficial Insects	2(1+1)
Agricultural Economics			
29.	BAG 205	Fundamentals of Agricultural Economics	2(2+0)
30.	BAG 303	Agricultural Finance and Co-Operation	3(2+1)
31.	BAG 408	Agricultural Marketing Trade & Prices	3(2+1)
32.	BAG 001	Agribusiness Management	3(2+1)*
33.	BAG 608	Farm Management, Production & Resource Economics	2(1+1)

Agricultural Engineering			
34.	BAG 203	Soil and Water Conservation Engineering	2(1+1)
35.	BAG 305	Farm Machinery and Power	2(1+1)
36.	BAG 403	Renewable Energy and Green Technology	2(1+1)
37.	BAG 602	Protected Cultivation and Secondary Agriculture	2(1+1)
Plant Pathology			
38.	BAG 206	Fundamentals of Plant Pathology	4(3+1)
39.	BAG 503	Diseases of Field and Horticultural Crops and their Management-I	3(2+1)
40.	BAG 603	Diseases of Field and Horticultural Crops and their Management-II	3(2+1)
41.	BAG 501	Principles of Integrated Pest and Disease Management	2(1+1)
Horticulture			
42.	BAG 101	Fundamentals of Horticulture	2(1+1)
43.	BAG 306	Production Technology for Vegetables and Spices	2(1+1)
44.	BAG 405	Production Technology for Fruit and Plantation Crops	2(1+1)
45.	BAG 402	Production Technology for Ornamental Crops, MAP and Landscaping	2(1+1)
46.	BAG 009	Hi-tech. Horticulture	3(2+1)*
47.	BAG 004	Landscaping	3(2+1)*
48.	BAG 604	Post-harvest Management and Value Addition of Fruits and Vegetables	2(1+1)
Food Science & Technology			
49.	BAG 609	Principles of Food Science & Nutrition	2(2+0)
Agricultural Extension and Communication			
50.	BAG 110	Rural Sociology & Educational Psychology	2(2+0)
51.	BAG 208	Fundamentals of Agricultural Extension Education	3(2+1)
52.	BAG 209	Communication Skills and Personality Development	2(1+1)
53.	BAG 505	Entrepreneurship Development and Business Communication	2(1+1)
54.	BAG 012	Agricultural Journalism	3(2+1)*
Biochemistry / Physiology / Microbiology/ Environmental Sciences (Basic Science)			
55.	BAG 204	Fundamentals of Crop Physiology	2(1+1)
56.	BAG 202	Agricultural Microbiology	2(1+1)
57.	BAG 307	Environmental Studies & Disaster Management	3(2+1)
58.	BAG 102	Fundamentals of Plant Biochemistry and Biotechnology	3(2+1)
	BAG104	Introduction to Forestry	2 (1+1)
Statistics, Computer Application and I.P.R.			
59.	BAG 308	Statistical Methods	2(1+1)
60.	BAG 304	Agri-Informatics	2 (1+1)

61.	BAG 508	Intellectual Property Rights	1(1+0)
Animal Production			
62.	BAG309	Livestock and Poultry Management	4(3+1)
Language			
63.	BAG 105	Comprehension & Communication Skills in English	2(1+1)
Remedial Courses			
64.	BAG 107	Introductory Biology	2(1+1)
65.	BAG 108	Elementary Mathematics	2(2+0)
2.	BAG 109	Agricultural Heritage	1(1+0)
Non-Gradiual Courses			
	BAG 158/258	Physical Education & Yoga Practices	2(0+2)
	BAG 111	Human Values & Ethics	1(1+0)
*: Elective course, 2(1+1)= 2 lecture per week (1 for lecture and 1 for practical)			

Semester: 7th

BAG751	Rural Agricultural Work Experience and Agro-industrial Attachment (RAWE & AIA)	
	Activities	No. of weeks
	General Orientation & On campus training by different faculties	1
	Village attachment	8
	Unit attachment in Univ./ College. KVK/ Research Station Attachment	5
	Plant clinic	2
	Agro-Industrial Attachment	3
	Project Report Preparation, Presentation and Evaluation	1
	Total weeks for RAWE & AIA	20

Semester: 8th

Subject Code	Title of the module (ELP PROGRAMME)	Credits
BAG851	Production Technology for Bioagents and Biofertilizer	0+10
BAG852	Seed Production and Technology	0+10
BAG853	Mushroom Cultivation Technology	0+10
BAG854	Soil, Plant, Water and Seed Testing	0+10
BAG855	Commercial Beekeeping	0+10
BAG856	Poultry Production Technology	0+10
BAG857	Commercial Horticulture	0+10
BAG858	Floriculture and Landscaping	0+10
BAG859	Food Processing	0+10
BAG860	Agriculture Waste Management	0+10
BAG861	Organic Production Technology	0+10
BAG862	Commercial Sericulture	0+10

ELP: Experiential Learning Programme

Examination Scheme (First Semester)

I Semester (Credit hours distribution)			
S.No	Course Code	Course Title	Credit Hours
1.	BAG101	Fundamental of horticulture	2 (1+1)
2.	BAG102	Fundamentals of Plant Biochemistry and Biotechnology	3(2+1)
3.	BAG103	Fundamentals of Soil Science	3 (2+1)
4.	BAG104	Introduction to Forestry	2 (1+1)
5.	BAG105	Comprehension & Communication Skills in English	2 (1+1)
6.	BAG106	Fundamentals of Agronomy	4(3+1)
7.	BAG107/BAG108	Introductory Biology*/ Elementary Mathematics*	2(1+1)/2(2+0)*
8.	BAG109	Agricultural Heritage*	1(1+0)*
9.	BAG110	Rural Sociology & Educational Psychology	2(2+0)
10.	BAG111	Human Values & Ethics **	1(1+0)
11.	BAG 158	Physical Education & Yoga Practices**-I	1(0+1)
TOTAL			18+03*+02**

*R: Remedial course; **NC: Non-gradual courses, 2(1+1): indicate 2 Lecture per week -one for lecture and one for practical

Evaluation Scheme									
Course code	Course title	C	L	P	PM	UT	ESM	T	MP
BAG101	Fundamental of horticulture	2	1	1	20	30	50	100	10.0
BAG102	Fundamentals of Plant Biochemistry and Biotechnology	3	2	1	20	30	50	100	10.0
BAG103	Fundamentals of Soil Science	3	2	1	20	30	50	100	10.0
BAG104	Introduction to Forestry	2	1	1	20	30	50	100	10.0
BAG105	Comprehension and Communication Skills in English	2	1	1	20	30	50	100	10.0

BAG 158	Physical Education & Yoga Practices**-I	1	0	1	100	0	0	100	0

*R: Remedial course; **NC: Non-gradual courses, C-Credit, L-Lecture, P-Practical, UT-Unit test, ESM: End semester marks, MP: Maximum points

Points obtained in a course= Obtained Points X No. of credits

GPA= Points obtained/Total credits

CGPA= Total points scored/ Course credits

OGPA= Total points scored (after excluding failure points)/Course credits

BAG 101: FUNDAMENTAL OF HORTICULTURE

Teaching Scheme	Examination Scheme
Lectures and Practical: 2 hr./ week (1+1)	Unit Test: 30Marks
Tutorials: Nil	Practical marks: 20Marks
Credits: 2	End Semester Exam:50Marks

Course Objectives:

1. To study about horticulture and its different branches.
2. To study the climate and soil required by different horticulture crops.
3. To study plant propagation methods and structures
4. To give an overview on unfruitfulness, pollination, fertilization and parthenocarpy
5. To give the knowledge of plant bio regulators in horticulture crops
6. To study cultivation of different aromatic and medicinal plants along with their uses

Syllabus

Theory

Horticulture - Its definition and branches, importance and scope; horticultural and botanical classification; climate and soil for horticultural crops; Plant propagation-methods and propagating structures; Seed dormancy, Seed germination, principles of orchard establishment; Principles and methods of training and pruning, juvenility and flower bud differentiation; unfruitfulness; pollination, pollinizers and pollinators; fertilization and parthenocarpy; medicinal and aromatic plants; importance of plant bio-regulators in horticulture. Irrigation – methods, Fertilizer application in horticultural crops.

Practical

Identification of garden tools; Identification of horticultural crops; Preparation of seed bed/nursery bed; Practice of sexual and asexual methods of propagation including micro-propagation; Layout and planting of orchard; Training and pruning of fruit trees; Preparation of potting mixture; Fertilizer application in different crops; Visits to commercial nurseries/orchard.

Text and Reference books:

1. Jitendra Singh, Basic horticulture Kalyani Publications, New Delhi
2. Chadha, K.L. Handbook of Horticulture (2002) ICAR, New Delhi
3. Kaushal Kumar Mishra and Rajesh Kumar Fundamentals of Horticulture 2014. Biotech Books
4. Basra, A.S. Plant Growth Regulators in Agriculture & Horticulture: Their Role and commercial use IBD

Course Outcomes:

After completing the course, students will be able to:

1. To get familiar with important horticulture trees
2. Preparation of quality planting material
3. Designing and shaping of trees
4. Learning about practices for cultivation of MAPs
5. Understand medicinal value of different plants

BAG102: FUNDAMENTALS OF PLANT BIOCHEMISTRY AND BIOTECHNOLOGY

Teaching Scheme	Examination Scheme
Lectures and Practical: 3 hr./ week (2+1) Tutorials: Nil Credits: 3	Unit Test: 30Marks Practical marks: 20Marks End Semester Exam:50Marks

Course Objectives:

1. To give complete knowledge and information about the subject
2. To give an overview of different types of biomolecules.
3. To explain the structure and function of plant constituents and components.
4. To describe all biological phenomena at molecular level.

Syllabus

Theory

Importance of Biochemistry. Properties of Water, pH and Buffer. Carbohydrate: Importance and classification. Structures of Monosaccharides, Reducing and oxidizing properties of Monosaccharides, Mutarotation; Structure of Disaccharides and Poly saccharides. Lipid: Importance and classification; Structures and properties of fatty acids; storage lipids and membrane lipids. Proteins: Importance of proteins and classification; Structures, titration and zwitterions nature of amino acids; Structural organization of proteins. Enzymes: General properties; Classification; Mechanism of action; Michaelis & Menten and Line Weaver Burk equation & plots; Introduction to allosteric enzymes. Nucleic acids: Importance and classification; Structure of Nucleotides, A, B & Z DNA; RNA: Types and Secondary & Tertiary structure. Metabolism of carbohydrates: Glycolysis, TCA cycle, Glyoxylate cycle, Electron transport chain. Metabolism of lipids: Beta oxidation, Biosynthesis of fatty acids.

Concepts and applications of plant biotechnology: Scope, organ culture, embryo culture, cell suspension culture, callus culture, anther culture, pollen culture and ovule culture and their applications; Micro-propagation methods; organogenesis and embryogenesis, Synthetic seeds and their significance; Embryo rescue and its significance; somatic hybridization and cybrids; Somaclonal variation and its use in crop improvement; cryo-preservation; Introduction to recombinant DNA methods: physical (Gene gun method), chemical (PEG mediated) and Agrobacterium mediated gene transfer methods; Transgenics and its importance in crop improvement; PCR techniques and its applications; RFLP, RAPD, SSR; Marker Assisted Breeding in crop improvement; Biotechnology regulations.

Practical

Preparation of solution, pH & buffers; Qualitative tests of carbohydrates and amino acids; Quantitative estimation of glucose/ proteins; Titration methods for estimation of amino acids/lipids; Effect of pH, temperature and substrate concentration on enzyme action; Paper chromatography/ TLC demonstration for separation of amino acids/ Monosaccharides; Sterilization techniques; Composition of various tissue culture media and preparation of stock solutions for MS nutrient medium; Callus induction from various explants; Micro-propagation, hardening and acclimatization; Demonstration on isolation of DNA; Demonstration of gel electrophoresis techniques and DNA finger printing.

Text and Reference books:

1. Plant Biochemistry- V. Arun Kumar, N. Senthil Kumar and K. Siva Kumar.
2. A Textbook of Biotechnology, Revised Edition, 2014, R.C. Dubey, S. Chand Publishing Company, New Delhi
3. Principles of Biochemistry by Albert Lehninger, David Nelson and Michael Cox, Seventh Edition, 2017 Macmillan Publishers.

Course Outcomes:**After completing the course, students will be able to:**

1. Understand the core principles and topics of Biochemistry and their experimental basis
2. Understand the structures and functions of enzymes, proteins, carbohydrates, fats, process of metabolism.
3. Understand about the molecular basis of the action of genes and DNA .

BAG 103: FUNDAMENTAL OF SOIL SCIENCE

Teaching Scheme	Examination Scheme
Lectures and Practical: 3 hr./ week (2+1)	Unit Test: 30Marks
Tutorials: Nil	Practical marks: 20Marks
Credits: 3	End Semester Exam:50Marks

Course Objectives:

- 1.To impart knowledge about basic concept of soil alumina silicate minerals.
2. To know the process of soil formation and soil classification.
3. To know the physical properties of soils and processes in relation to plant growth.
4. This course also familiarize student with soil colloids, ion exchange phenomenon, problems of soil irrigation water quality and soil environment quality

Syllabus

Theory

Soil as a natural body, Pedological and edaphological concepts of soil; Soil genesis: soil forming rocks and minerals; weathering, processes and factors of soil formation; Soil Profile, components of soil; Soil physical properties: soil-texture, structure, density and porosity, soil colour, consistence and plasticity; Elementary knowledge of soil taxonomy classification and soils of India; Soil water retention, movement and availability; Soil air, composition, gaseous exchange, problem and plant growth, Soil temperature; source, amount and flow of heat in soil; effect on plant growth, Soil reaction-pH, soil acidity and alkalinity, buffering, effect of pH on nutrient availability; soil colloids - inorganic and organic; silicate clays: constitution and properties; sources of charge; ion exchange, cation exchange capacity, base saturation; soil organic matter: composition, properties and its influence on soil properties; humic substances - nature and properties; soil organisms: macro and micro organisms, their beneficial and harmful effects; Soil pollution - behaviour of pesticides and inorganic contaminants, prevention and mitigation of soil pollution.

Practical

Study of soil profile in field; Study of soil sampling tools, collection of representative soil sample, its processing and storage; Study of soil forming rocks and minerals; Determination of soil density, moisture content and porosity; Determination of soil texture by feel and Bouyoucos Methods; Studies of capillary rise phenomenon of water in soil column and water movement in soil; Determination of soil pH and electrical conductivity; Determination of cation exchange capacity of soil; Study of soil map; Determination of soil colour; Demonstration of heat transfer in soil; Estimation of organic matter content of soil.

Text and Reference books:

- 1.Fundamental of Soil Science.2012. Indian Society of Soil Science.2nd Edition.
- 2.Dilip Kumar Das.2015. Introductory Soil Science. Kalyani Publishers (4 edition).

Course Outcomes:

After completing the course, students will be able to:

1. Understand about soil its properties and linkage with crop production
2. Management of soils
2. Determination of different soil properties

BAG104: INTRODUCTION TO FORESTRY

Teaching Scheme	Examination Scheme
Lectures and Practical: 2 hr./ week (1+1)	Unit Test: 30Marks
Tutorials: Nil	Practical marks: 20Marks
Credits: 2	End Semester Exam:50Marks

Course Objectives:

1. To give complete knowledge and information about the subject
2. To give an overview of different types of trees and other plants
3. To explain the Indian and International history of its development.
4. To describe all growth and development phases and losses to the forest
5. To give the knowledge of importance of management and conservation of forest for society and earth.

Syllabus

Theory

Introduction – definitions of basic terms related to forestry, objectives of silviculture, forest classification, salient features of Indian Forest Policies. Forest regeneration, Natural regeneration - natural regeneration from seed and vegetative parts, coppicing, pollarding, root suckers; Artificial regeneration – objectives, choice between natural and artificial regeneration, essential preliminary considerations. Crown classification. Tending operations – weeding, cleaning, thinning – mechanical, ordinary, crown and advance thinning. Forest mensuration – objectives, diameter measurement, instruments used in diameter measurement; Non instrumental methods of height measurement - shadow and single pole method; Instrumental methods of height measurement - geometric and trigonometric principles, instruments used in height measurement; tree stem form, form factor, form quotient, measurement of volume of felled and standing trees, age determination of trees. Agroforestry – definitions, importance, criteria of selection of trees in agroforestry, different agroforestry systems prevalent in the country, shifting cultivation, Taunya, alley cropping, wind breaks and shelter belts, home gardens. Cultivation practices of two important fast growing tree species of the region.

Practical

Identification of tree-species; Diameter measurements using calipers and tape; Diameter measurements of forked, buttressed, fluted and leaning trees; Height measurement of standing trees by shadow method single pole method and hypsometer; Volume measurement of logs using various formulae; Nursery lay out, seed sowing, vegetative propagation techniques; Forest plantations and their management; Visits of near by forest based industries.

Text and Reference books:

1. Indian Forestry by Manikandan and Jain, Kalyani publisher
2. Forest mensuration by A. N. Chaturvedi, L. S. Khanna, International Book Distributors

Course Outcomes:

After completing the course, students will be able to:

1. Understand the different types of plants and forest in nature or earth
2. Understand the methods for felling of trees and regeneration of crop.
3. Understand about the importance of protection and conservation of flora and fauna.
4. Understand the role of forest in global aspects.
5. Understand the basic concepts and the scope of forestry.

BAG105: COMPREHENSION & COMMUNICATION SKILLS IN ENGLISH**Teaching Scheme**

Lectures and Practical: 2 hr./ week (1+1)

Tutorials: Nil

Credits: 2

Examination Scheme

Unit Test: 30Marks

Practical marks: 20Marks

End Semester Exam:50Marks

Course Objectives:

1. To provide an overview of prerequisites to Business Communication.
2. To put in use the basic mechanics of Grammar.
3. Analyze a variety of communication acts.
4. Ethically use, document and integrate sources.
5. Students will identify and explain their goals for the semester.
6. Identify the needs communication helps us meet.
7. Identify common misconceptions about communication
8. Explain communication competence
9. Identify the reasons we commit perceptual errors.
10. To impart the correct practices of the strategies of Effective Business Writing.

Syllabus**Theory**

War Minus Shooting- The sporting Spirit. A Dilemma- A layman looks at science Raymond B. Fosdick. You and Your English – Spoken English and broken English G.B. Shaw. Reading Comprehension, Vocabulary- Antonym, Synonym, Homophones, Homonyms, often confused words. Exercises to Help the students in the enrichment of vocabulary based on TOEFL and other competitive examinations. Functional grammar: Articles, Prepositions, Verb, Subject verb Agreement, Transformation, Synthesis, Direct and Indirect Narration. Written Skills: Paragraph writing, Precise writing, Report writing and Proposal writing. The Style: Importance of professional writing. Preparation of Curriculum Vitae and Job applications. Synopsis Writing. Interviews: kinds, Importance and process.

Practical

Listening Comprehension: Listening to short talks lectures, speeches (scientific, commercial and general in nature); Oral Communication: Phonetics, stress and intonation; Conversation practice; Conversation: rate of speech, clarity of voice, speaking; Listening, politeness & Reading skills: reading dialogues, rapid reading, intensive reading, improving reading skills; Mock Interviews: testing initiative, team spirit, leadership, intellectual ability; Group Discussions.

Course Outcomes:**After completing the course, students will be able to:**

1. To draft effective business correspondence with brevity and clarity.
2. Students will be able to find, use, and evaluate primary academic writing associated with the communication discipline.
3. Students will be able to communicate effectively orally and in writing.
4. To demonstrate his verbal and non-verbal communication ability through presentations.

BAG106: FUNDAMENTALS OF AGRONOMY

Teaching Scheme	Examination Scheme
Lectures and Practical: 4 hr./ week (3+1)	Unit Test: 30Marks
Tutorials: Nil	Practical marks: 20Marks
Credits: 4	End Semester Exam:50Marks

Course Objectives:

1. To impart basic knowledge of agronomy and its scope
2. To give an overview of different types of crops and their classification
3. To understand the production and classification of manures and fertilizers.
4. To impart knowledge on irrigation, its requirement and scheduling and methods of application
5. Identification, classification and management of weeds.

Syllabus

Theory

Agronomy and its scope, seeds and sowing, tillage and tilth, crop density and geometry, Crop nutrition, manures and fertilizers, nutrient use efficiency, water resources, soil-plant-water relationship, crop water requirement, water use efficiency, irrigation- scheduling criteria and methods, quality of irrigation water, logging.

Weeds- importance, classification, crop weed competition, concepts of weed management principles and methods, herbicides- classification, selectivity and resistance, allelopathy. Growth and development of crops, factors affecting growth and development, plant ideotypes, crop rotation and its principles, adaptation and distribution of crops, crop management technologies in problematic areas, harvesting and threshing of crops.

Practical

Identification of crops, seeds, fertilizers, pesticides and tillage implements; Study of agroclimatic zones of India; Identification of weeds in crops; Methods of herbicide and fertilizer application; Study of yield contributing characters and yield estimation; Seed germination and viability test; Numerical exercises on fertilizer requirement, plant population, herbicides and water requirement; Use of tillage implements-reversible plough, one way plough, harrow, leveler, seed drill; Study of soil moisture measuring devices; Measurement of field capacity, bulk density and infiltration rate; Measurement of irrigation water.

Text and Reference books:

1. Reddy, T.Yellamanda and Reddy, G.H. Sankara. 2016. Principles of Agronomy (2nd edition) , Kalyani Publishers, Ludhiana
2. ICAR. 2010. Handbook of Agriculture (6th edition), Indian Council of Agricultural Research, New Delhi.
3. Reddy, S.R.2012. Principles of Crop Production (4th edition), Kalyani Publishers, Ludhiana
4. Gupta , O.P. 2005. Weed Management: Principles and Practices (2nd Ed) Agribios (India) Jodhpur.
5. . De, Gopal Chandra 1989, Fundamentals of Agronomy. Oxford & IBH Publishing Co., New-Delhi.

Course Outcomes:

After completing the course, students will be able to:
1. Broad knowledge on different components of agriculture
2. Get acquainted with modern machines and agricultural tools
3. Managing inputs both monetary and non-monetary in a scientific manner
4. Learning about irrigation methods and its precise application
5. Preventing unproductive losses on and off the fields

BAG107: INTRODUCTORY BIOLOGY

Course Objectives:

1. To give complete knowledge and information about the subject
2. To give an overview of different types of cells and organisms on earth
3. To give the formation history and origin of life on earth
4. To describe all types of plant and animal kingdom and their evolution

Syllabus

Theory

Introduction to the living world, diversity and characteristics of life, origin of life, Evolution and Eugenics; Binomial nomenclature and classification; Cell and cell division; Morphology of flowering plants; Seed and seed germination; Plant systematic- viz; Brassicaceae, Fabaceae and Poaceae. Role of animals in agriculture.

Practical

Morphology of flowering plants – root, stem and leaf and their modifications; Inflorescence, flower and fruits. Cell, tissues & cell division; Internal structure of root, stem and leaf; Study of specimens and slides; Description of plants - Brassicaceae, Fabaceae and Poaceae.

Course Outcomes:

After completing the course, students will be able to:

1. Understand the levels of organization and related functions in plants and animals.
2. Understand the characteristics and basic needs of living individuals and their environment
3. Understand about the growth and development of organisms.
4. The student will be able to explain the importance of biodiversity at the genetic, organismal, community, and global scales.

Teaching Scheme Lectures and Practical: 2 hr./ week (1+1) Tutorials: Nil Credits: 2	Examination Scheme Unit Test: 30Marks Practical marks: 20Marks End Semester Exam:50Marks
BAG108: ELEMENTARY MATHEMATICS	
Teaching Scheme Lectures: 2 hr./ week (2+0) Tutorials: Nil Credits: 2	Examination Scheme Unit Test: 50Marks End Semester Exam:50Marks

Course Objectives:

1. To give complete knowledge and information about the subject
2. To give knowledge on basics of calculation and computation
3. Learning various methods and procedures of calculations
4. To understand and be able to use the language, symbols and notation of mathematics
5. Learn to solve systems of linear equations and application problems requiring them

Syllabus

Theory

Straight lines : Distance formula, section formula (internal and external division), Change of axes (only origin changed), Equation of co-ordinate axes, Equation of lines parallel to axes, Slope-intercept form of equation of line, Slope-point form of equation of line, Two point form of equation of line, Intercept form of equation of line, Normal form of equation of line, General form of equation of line, Point of intersection of two st. lines, Angles between two st. lines, Parallel lines, Perpendicular lines, Angle of bisectors between two lines, Area of triangle and quadrilateral. Circle: Equation of circle whose centre and radius is known, General equation of a circle, Equation of circle passing through three given points, Equation of circle whose diameters is line joining two points (x_1, y_1) & (x_2, y_2) , Tangent and Normal to a given circle at given point (Simple problems), Condition of tangency of a line $y = mx + c$ to the given circle $x^2 + y^2 = a^2$. Differential Calculus : Definition of function, limit and continuity, Simple problems on limit, Simple problems on continuity, Differentiation of x^n , e^x , $\sin x$ & $\cos x$ from first principle, Derivatives of sum, difference, product and quotient of two functions, Differentiation of functions of functions (Simple problem based on it), Logarithmic differentiation (Simple problem based on it), Differentiation by substitution method and simple problems based on it, Differentiation of Inverse Trigonometric functions. Maxima and Minima of the functions of the form $y=f(x)$ (Simple problems based on it).

Integral Calculus: Integration of simple functions, Integration of Product of two functions, Integration by substitution method, Definite Integral (simple problems based on it), Area under simple well-known curves (simple problems based on it).

Matrices and Determinants: Definition of Matrices, Addition, Subtraction, Multiplication, Transpose and Inverse up to 3rd order, Properties of determinants up to 3rd order and their evaluation.

Text and Reference books:

1. Krishi Ganita by Gokhroo and Jain
2. Differential Calculus by Gokhroo.
3. Integral Calculus by Gokhroo.
4. Shukla, R.K. and Kumar, K.2010. A Text Book Of Remedial Mathematics. A.B. Publication

Course Outcomes:

After completing the course, students will be able to:

BAG109: AGRICULTURAL HERITAGE

Teaching Scheme

Lectures: 1 hr./ week (1+0)

Tutorials: Nil

Credits: 1

Examination Scheme

Unit test:50

End Semester Exam: 50 Marks

1. Development of skills in different aspect of mathematical procedures.

2. Develop mathematical curiosity and use inductive and deductive reasoning when solving problems.

3. Solve the matrix equation $Ax = b$ using row operations and matrix operations.

Course Objectives:

1. To give complete knowledge and information about the subject
2. To give an overview of journey of Indian agriculture
3. To give knowledge on agriculture setup in India
4. To describe all the issues related to agriculture.

Syllabus

Theory

Introduction of Indian agricultural heritage; Ancient agricultural practices, Relevance of heritage to present day agriculture; Past and present status of agriculture and farmers in society; Journey of Indian agriculture and its development from past to modern era; Plant production and protection through indigenous traditional knowledge; Crop voyage in India and world; Agriculture scope; Importance of agriculture and agricultural resources available in India; Crop significance and classifications; National agriculture setup in India; Current scenario of Indian agriculture; Indian agricultural concerns and future prospects.

Text and Reference books

1. ICAR 1989 Handbook of Agriculture, Indian Council of Agricultural Research, New-Delh
2. Nene, Y.L. 2007. Glimpses of the Agricultural Heritage of India. Asian Agri-Histroy Foundation, Secunderabad, Andhra Pradesh
3. Nene, Y.L., Choudhary, S.L. and Saxena, R.C. 2010. Textbook on Ancient History of Indian Agriculture, Asian Agri-History Foundation
4. Omprakash and S/Kumar.2019. Agriculture heritage, Rama publishing house.

Course Outcomes:

After completing the course, students will be able to:

1.Understanding the ancient agricultural practices.

2. Quittance with different ITK practices.

3. Knowing about agriculture education research and development setup in the country

BAG 110: RURAL SOCIOLOGY & EDUCATIONAL PSYCHOLOGY**Teaching Scheme**

Lectures: 2 hr./ week (2+0)

Tutorials: Nil

Credits: 2

Teaching Scheme

Lectures: 2 hr./ week (2+0)

Tutorials: Nil

Credits: 2

4. Learning present issues and future prospects related to agriculture

Course Objectives:

1. To give complete knowledge and information about the subject
2. To give an overview of Panchayati raj system of India
3. To explain the difference between sociology and psychology

Syllabus**Theory**

Sociology and Rural sociology: Definition and scope, its significance in agriculture extension, Social Ecology, Rural society, Social Groups, Social Stratification, Culture concept, Social Institution, Social Change & Development. Educational psychology: Meaning & its importance in agriculture extension. Behavior: Cognitive, affective, psychomotor domain, Personality, Learning, Motivation, Theories of Motivation, Intelligence.

Text and Reference books

1. Desai, A.R. 1978. Rural sociology in India. Bombay, Popular Prakashan, 5th Rev. ed.
2. Doshi, S.L. 2007. Rural sociology. Rawat Publishers, Delhi
3. Sharma O. P. and Somani L. L. 2012. Fundamentals of Rural Sociology and Educational Psychology. Agrotech Pub. Co., Udaipur.

Course Outcomes:**After completing the course, students will be able to:**

1. Understanding rural scenario of the country.
2. Understanding traditional knowledge and its application.
3. Understanding rural social structures.
4. Understanding steps to elevate rural problems.

BAG 111: HUMAN VALUE AND ETHICS

Teaching Scheme Lectures: 1 hr./ week (1+0) Tutorials: Nil Credits: 1	Examination Scheme Unit Test: 50 Marks End Semester Exam: 50 Marks
---	---

Course Objectives:

- 1.To assist students in understanding the differences between values and skills in understanding the need, basic guidelines, content and the process of value education.
- 2.To help students initiate a process of dialog within themselves to understand what they ‘really want to be’ in their lives and professions
3. To help students understand the meaning of happiness and prosperity for human beings.
- 4.To help students understand harmony at all the levels of human living and to lead an ethical life.

Syllabus**Theory**

Values and Ethics-An Introduction. Goal and Mission of Life. Vision of Life. Principles and Philosophy. Self Exploration. Self Awareness. Self Satisfaction. Decision Making. Motivation. Sensitivity. Success. Selfless Service. Case Study of Ethical Lives. Positive Spirit. Body, Mind and Soul. Attachment and Detachment. Spirituality Quotient. Examination

Course Outcomes:**After completing the course, students will be able to:**

- 1.Understanding truth of life, family and social values
2. Understanding stress and its management
3. Preparing and planning to be a good citizen

BAG 158:PHYSICAL EDUCATION & YOGA PRACTICES

Teaching Scheme	Examination Scheme
Lectures: 2 hr./ week (0+2) Tutorials: Nil Credits: 2	Practical marks: 100 Marks

Course Objectives:

1. Aims at evoking social consciousness among students through various activities viz., working together.
2. To reduce the gap between educated and uneducated community.
3. To make student aware about the benefits of health.
4. To develop self-employment ability among the students.

Practical:

Course aims at evoking social consciousness among students through various activities viz., working together, constructive and creative social work, to be skillful in executing democratic leadership, developing skill in programme development to be able for self employment, reducing gap between educated and uneducated, increasing awareness and desire to help sections of society.

Physical Education and Yoga Practices Credit hours: 2(0+2)

Semester I: Physical Education and Yoga Practices

Semester I: Physical Education and Yoga Practices

1. Teaching of skills of Football – demonstration, practice of the skills, correction, involvement in game situation (For girls teaching of Tennikoit)
2. Teaching of different skills of Football – demonstration, practice of the skills, correction, involvement in game situation (For girls teaching of Tennikoit)
3. Teaching of advance skills of Football – involvement of all the skills in game situation with teaching of rules of the game
4. Teaching of skills of Basketball – demonstration, practice of the skills, correction of skills, involvement in game situation
5. Teaching of skills of Basketball – demonstration, practice of the skills, involvement in game situation
6. Teaching of skills of Basketball – involvement of all the skills in game situation with teaching of rule of the game
7. Teaching of skills of Kabaddi – demonstration, practice of the skills, correction of skills, involvement in game situation
8. Teaching of skills of Kabaddi – demonstration, practice of the skills, correction of skills, involvement in game situation
9. Teaching of advance skills of Kabaddi – involvement of all the skills in game situation with teaching of rule of the game

10. Teaching of skills of Ball Badminton – demonstration, practice of the skills, correction of skills, involvement in game situation
 11. Teaching of skills of Ball Badminton – involvement of all the skills in game situation with teaching of rule of the game
 12. Teaching of some of Asanas – demonstration, practice, correction and practice
 13. Teaching of some more of Asanas – demonstration, practice, correction and practice
 14. Teaching of skills of Table Tennis – demonstration, practice of skills, correction and practice and involvement in game situation
 15. Teaching of skills of Table Tennis – demonstration, practice of skills, correction and practice and involvement in game situation
 16. Teaching of skills of Table Tennis – involvement of all the skills in game situation with teaching of rule of the game
 17. Teaching – Meaning, Scope and importance of Physical Education
 18. Teaching – Definition, Type of Tournaments
 19. Teaching – Physical Fitness and Health Education
 20. Construction and laying out of the track and field (*The girls will have Tennikoit and Throw Ball).
- Note: 1)** Compulsory Uniform: Half pants, Tee Shirts, Shoes and socks all white (Girls will have white Tee Shirt and Track pants) 2) The games mentioned in the practical may be inter changed depending on the season and facilities.

II Semester (Credit hours distribution)			
S.No.	Course Code	Course Title	Credit Hours
1.	BAG 201	Fundamental of Genetics	3 (2+1)
2.	BAG 202	Agricultural Microbiology	2 (1+1)
3.	BAG203	Soil and Water Conservation Engineering	2 (1+1)
4.	BAG204	Fundamentals of Crop Physiology	2 (1+1)
5.	BAG205	Fundamentals of Agricultural Economics	2 (2+0)
6.	BAG206	Fundamentals of Plant Pathology	4(3+1)
7.	BAG207	Fundamentals of Entomology	4(3+1)
8.	BAG208	Fundamentals of Agricultural Extension Education	3(2+1)
9.	BAG209	Communication Skills and Personality Development	2(1+1)
10.	BAG 258	Physical Education & Yoga Practices**-II	1(0+1)
TOTAL CREDITS			24 (16+8)+1**

****NC:** Non-gradual courses, 3(2+1) : Three lectures in a week indicate 2 Lecture and one practical in a week.

Examination Scheme (II Semester)

Evaluation Scheme									
Course code	Course title	C	L	P	PM	UT	ESM	T	MP
BAG201	Fundamentals of Genetics	3	2	1	20	30	50	100	10.0

C-Credit, L-Lecture, P-Practical, UT-Unit test, ESM: End semester marks, MP: Maximum points

Points obtained in a course= Obtained Points X No. of credits

BAG 201: FUNDAMENTALS OF GENETICS

Teaching Scheme	Examination Scheme
Lecture and Practical: 3 hr./ week (2+1)	Unit Test: 30 Marks
Tutorials: Nil	Practical marks: 20 Marks
Credits: 3	End Semester Exam:50 Marks

GPA= Points obtained/Total credits

CGPA= Total points scored/ Course credits

OGPA= Total points scored (after excluding failure points)/Course credits

Course Objectives:

1. To study about mendelian concepts and principles of heredity.
2. To study the chromosome morphology, cell cycle and cell division.
3. To study the linkage and crossing over mechanisms
4. To give an overview on haploids and mutations.
5. To give the knowledge of protein synthesis, transcription and gene concepts.

Syllabus

Theory

Pre and Post Mendelian concepts of heredity, Mendelian principles of heredity. Architecture of chromosome; chromonemata, chromosome matrix, chromomeres, centromere, secondary constriction and telomere; special types of chromosomes. Chromosomal theory of inheritance- cell cycle and cell division- mitosis and meiosis. Probability and Chi-square. Dominance relationships, Epistatic interactions with example.

Multiple alleles, pleiotropism and pseudoalleles, Sex determination and sex linkage, sex limited and sex influenced traits, Blood group genetics, Linkage and its estimation, crossing over mechanisms, chromosome mapping. Structural and numerical variations in chromosome and their implications, Use of haploids, dihaploids and doubled haploids in Genetics. Mutation, classification, Methods of inducing mutations & CIB technique, mutagenic agents and induction of mutation. Qualitative & Quantitative traits, Polygenes and continuous variations, multiple factor hypothesis, Cytoplasmic inheritance. Genetic disorders. Nature, structure & replication of genetic material. Protein synthesis, Transcription and translational mechanism of genetic material, Gene concept: Gene structure, function and regulation, Lac and Trp operons.

Practical

Study of microscope; Study of cell structure; Mitosis and Meiosis cell division; Experiments on monohybrid, dihybrid, trihybrid, test cross and back cross; Experiments on epistatic interactions including test cross and back cross; Practice on mitotic and meiotic cell division; Experiments on probability and Chi-square test; Determination of linkage and cross-over analysis (through two point test cross and three point test cross data); Study on sex linked inheritance in *Drosophila*; Study of models on DNA and RNA structures.

Text and Reference books:

- 1.Singh, B.D. 2014. Fundamental of Genetics. Kalyani Publishing House, New Delhi.
- 2.Singh, B.D. 2001.Genetics. Kalyani Publishing House, New Delhi.
- P. Singh. Genetics. Kalyani Publishing House, New Delhi.

Course Outcomes:

After completing the course, students will be able to:

1. Understand concepts and principles of heredity.
2. Understand genetic architecture of chromosome and cell division (mitosis and meiosis)
3. Understand gene concepts and its role in crop improvement
4. Understand role of haploids and mutation on crop plants
5. Understand qualitative & quantitative traits
6. Understand about the transcription and translation process.
7. Understand allele interaction and linkage and crossing over techniques

BAG 202: AGRICULTURAL MICROBIOLOGY

Teaching Scheme	Examination Scheme
Lecture and Practical: 2 hr./ week (1+1)	Unit Test: 30 Marks
Tutorials: Nil	Practical marks: 20 Marks
Credits: 2	End Semester Exam:50 Marks

Course Objectives:

1. To study about prokaryotic and eukaryotic microbes.
2. To study the genetic recombination, conjugation, transduction, plasmids and transposon in bacterial cell.
3. To study the role of of microbes in soil fertility and crop production.
4. To give an overview on microbes in human welfare.

Syllabus**Theory**

Introduction. Microbial world: Prokaryotic and eukaryotic microbes. Bacteria: cell structure chemoautotrophy, photo autotrophy, growth. Bacterial genetics: Genetic recombination transformation, conjugation and transduction, plasmids, transposon.

Role of microbes in soil fertility and crop production: Carbon, Nitrogen, Phosphorus and Sulphur cycles. Biological nitrogen fixation- symbiotic, associative and asymbiotic. Azolla, blue green algae and mycorrhiza. Rhizosphere and phyllosphere. Microbes in human welfare: silage production, biofertilizers, biopesticides, biofuel production and biodegradation of agro-waste.

Practical

Introduction to microbiology laboratory and its equipment's; Microscope- parts, principles of microscopy, resolving power and numerical aperture; Methods of sterilization; Nutritional media and their preparations; Enumeration of microbial population in soil-bacteria, fungi, actinomycetes; Methods of isolation and purification of microbial cultures; Isolation of *Rhizobium* from legume root nodule; Isolation of *Azotobacter* from soil; Isolation of *Azospirillum* from roots; Isolation of BGA; Staining and microscopic examination of microbes.

Text and Reference books:

1. Biswas, T.D. and Mukherjee, S.K. 1990. Text Book of Soil Sciences, Tata McGraw Hill Publishing Company Limited, New Delhi
2. Mukherjee, N. and Ghosh T. 1998. Agricultural Microbiology, Kalyani Publishers, New Delhi.
3. Pelczar, Jr. Michel J. Chan, E.C.S. and Krieg, Noel R. 1997. Microbiology. Tata McGraw - Hill Edition, 1993. India.
4. Rangaswami, G. and Bagyaraj, D.J. 2010. IInd ed. Agricultural Microbiology. Prentice Hall of India Pvt. Limited, New Delhi

Course Outcomes:**After completing the course, students will be able to:**

1. Understand prokaryotic and eukaryotic microorganisms.
2. Understand Bacteria cell structure chemoautotrophy and photo autotrophy
3. Understand genetic recombination, conjugation, transduction, plasmids and transposon in bacterial cell.

4. Understand carbon, nitrogen, phosphorus and Sulphur cycles

BAG 203: SOIL AND WATER CONSERVATION ENGINEERING

Teaching Scheme

Lecture and Practical: 2 hr./ week (1+1)

Tutorials: Nil

Credits: 2

Examination Scheme

Unit Test: 30 Marks

Practical marks: 20 Marks

End Semester Exam:50 Marks

5. Understand biological nitrogen fixation in soil fertility

6. Understand role of biofertilizers, biopesticides and biofuel in human welfare.

Course Objectives:

1. To give complete knowledge and information about the subject.
2. To give an overview of different types of structure and design of conservation practices.
3. To explain the difference practices of soil and water conservation.
4. To describe all methods and practices of conservation.

Syllabus

Theory

Introduction to Soil and Water Conservation, causes of soil erosion. Definition and agents of soil erosion, water erosion: Forms of water erosion. Gully classification and control measures. Soil loss estimation by universal Loss Soil Equation. Soil loss measurement techniques. Principles of erosion control: Introduction to contouring, strip cropping. Contour bund. Graded bund and bench terracing. Grassed water ways and their design. Water harvesting and its techniques. Wind erosion: mechanics of wind erosion, types of soil movement. Principles of wind erosion control its control measures.

Practical

General status of soil conservation in India; Calculation of erosion index; Estimation of soil loss; Measurement of soil loss; Preparation of contour maps; Design of grassed water ways; Design of contour bunds; Design of graded bunds; Design of bench terracing system; Problem on wind erosion.

Text and Reference Books

1. Land and Water Management Engineering. 1982. Murthy V.V.N. Kalyani Pubhliers, New Delhi.
2. Principles of Agricultural. Engineering. Vol. II. 2012. Michael A.M. and T.P. Ojha. Jain Brothers, New Delhi.
3. Soil and Water Conservation Water Management. 2010. Mahnot, S.C., Singh P.K. and Chaplot, P.C.,. Apex Publication House, Udaipur.

Course Outcomes:

After completing the course, students will be able to:

1. Understand the different types of soil and water conservation practices.
2. Understand the design of conservation practices.
3. Understand about the different terminology related to conservation practices.

BAG 204: FUNDAMENTALS OF CROP PHYSIOLOGY

Teaching Scheme	Examination Scheme
Lecture and Practical: 2 hr./ week (1+1)	Unit Test: 30 Marks
Tutorials: Nil	Practical marks: 20 Marks
Credits: 2	End Semester Exam:50 Marks

4. Understand the methods and practices for conservation approach.

Course Objectives:

1. To give complete knowledge and information about the subject
2. To give an overview of different types of pathways for growth of a plant.
3. To explain the nutrient requirement, its importance, function in a plant.
4. To describe the role of hormones in plant development.
5. To give the knowledge of the physical, chemical and biological functions of living plants.

Syllabus

Theory

Introduction to crop physiology and its importance in Agriculture; Plant cell: an Overview Diffusion and osmosis; Absorption of water, transpiration and Stomatal Physiology; Mineral nutrition of Plants: Functions and deficiency symptoms of nutrients, nutrient uptake mechanisms; Photosynthesis: Light and Dark reactions, C₃, C₄ and CAM plants; Respiration: Glycolysis, TCA cycle and electron transport chain; Fat Metabolism: Fatty acid synthesis and Breakdown; Plant growth regulators: Physiological roles and agricultural uses, Physiological aspects of growth and development of major crops: Growth analysis, Role of Physiological growth parameters in crop productivity.

Practical

Study of plant cells, structure and distribution of stomata, imbibitions, osmosis, plasmolysis; Measurement of root pressure rate of transpiration; Separation of photosynthetic pigments through paper chromatography; Rate of transpiration, photosynthesis, respiration, tissue test for mineral nutrients; Estimation of relative water content; Measurement of photosynthetic CO₂ assimilation by Infra Red Gas Analyser (IRGA).

Text and Reference books

1. S. N. Pandey and B. K. Sinha (1995). Plant physiology. Vikas Publishing House Pvt. Ltd., new Delhi
2. L. Taiz and E. Zieger (2006). Plant Physiology. 4th Ed. Sinauer Associates.

Course Outcomes:

After completing the course, students will be able to:

1. Understand the functions of a living organism or any of its parts.
2. Understand its importance in agriculture fields, medicine, food production and textiles.
3. Understand about the physiologists can expect jobs at agricultural industries,

BAG 205: FUNDAMENTALS OF AGRICULTURAL ECONOMICS

Teaching Scheme

Lecture and Practical: 2 hr./ week (2+0)

Tutorials: Nil

Credits: 2

Examination Scheme

Unit test : 50 Marks

End Semester Exam:50 Marks

manufacturing industries, public and private sectors.

Course Objectives:

1. To study about economics and its role in agriculture.
2. To study economic principles, with emphasis on their application to the solution of farm, agribusiness, and agricultural industry problems.
3. To study demand and supply theory and competitive environments.
4. To study about money and taxes.

Syllabus

Theory

Economics: Meaning, scope and subject matter, definitions, activities, approaches to economic analysis; micro and macro economics, positive and normative analysis. Nature of economic theory; rationality assumption, concept of equilibrium, economic laws as generalization of human behavior. Basic concepts: Goods and services, desire, want, demand, utility, cost and price, wealth, capital, income and welfare. Agricultural economics: meaning, definition, characteristics of agriculture, importance and its role in economic development. Agricultural planning and development in the country.

Demand: meaning, law of demand, schedule and demand curve, determinants, utility theory; law of diminishing marginal utility, equi-marginal utility principle. Consumer's equilibrium and derivation of demand curve, concept of consumer surplus. Elasticity of demand: concept and measurement of price elasticity, income elasticity and cross elasticity. Production: process, creation of utility, factors of production, input output relationship.

Laws of returns: Law of variable proportions and law of returns to scale. Cost: concepts, short run and long run cost curves. Supply: Stock v/s supply, law of supply, schedule, supply curve, determinants of supply, elasticity of supply. Market structure: meaning and types of market, basic features of perfectly competitive and imperfect markets. Price determination under perfect competition; short run and long run equilibrium of firm and industry, shut down and break even points.

Distribution theory: meaning, factor market and pricing of factors of production. Concepts of rent, wage, interest and profit.

National income: Meaning and importance, circular flow, concepts of national income accounting and approaches to measurement, difficulties in measurement. Population: Importance, Malthusian and Optimum population theories, natural and socioeconomic determinants, current policies and programmes on population control.

Money: Barter system of exchange and its problems, evolution, meaning and functions of money, classification of money, supply, general price index, inflation and deflation. Banking: Role in modern economy, types of banks, functions of commercial and central

bank, credit creation policy. Agricultural and public finance: meaning, micro v/s macro finance, need for agricultural finance, public revenue and public expenditure.

Tax: meaning, direct and indirect taxes, agricultural taxation, VAT. Economic systems: Concepts of economy and its functions, important features of capitalistic, socialistic and mixed economies, elements of economic planning.

Text and Reference books:

1. Bhavani Devi,P. Raghu Ram,S. SubbaReddy,T.V. Neelakanta Sastry, 2009, Agricultural economics, Oxford and IBH Co. Pvt. Ltd., , New Delhi.
2. K. K. Dewett and J. D. Varma, 1986, Elementary Economic Theory, S. Chand & Company, New Delhi.
3. Latika Sharma et al (2014) Principles of agricultural economics, Agrotech publishers, Udaipur.

Course Outcomes:

After completing the course, students will be able to:

1. Understanding agricultural set up and its financial management
2. Understanding farm management
3. Computation of economic and cost reduction
4. Rationalizing agricultural inputs and practices

BAG 206: FUNDAMENTALS OF PLANT PATHOLOGY

Teaching Scheme	Examination Scheme
Lecture and Practical: 4 hr./ week (3+1)	Unit Test: 30 Marks
Tutorials: Nil	Practical marks: 20 Marks
Credits: 4	End Semester Exam: 50 Marks

Course Objectives:

1. To study about importance, scope Plant Pathology.
2. To study the biotic, abiotic and mesobiotic causes of plants disease.
3. To explain the Disease Triangle.
4. To give an overview of growth and reproduction of plant pathogens.
5. To study mechanism of disease development by the pathogens
6. To know the methods of managements of plant disease.

Syllabus

Theory

Introduction: Importance of plant diseases, scope and objectives of Plant Pathology. History of Plant Pathology with special reference to Indian work. Terms and concepts in Plant Pathology. Pathogenesis. Causes / factors affecting disease development: disease triangle and tetrahedron and classification of plant diseases. Important plant pathogenic organisms, different groups: fungi, bacteria, fastidious vesicular bacteria, phytoplasmas, spiroplasmas, viruses, viroids, algae, protozoa, phanerogamic parasites and nematodes with examples of diseases caused by them. Diseases and symptoms due to abiotic causes.

Fungi: general characters, definition of fungus, somatic structures, types of fungal thalli, fungal tissues, modifications of thallus, reproduction (asexual and sexual). Nomenclature, Binomial system of nomenclature, rules of nomenclature, classification of fungi. Key to divisions, sub-divisions, orders and classes.

Bacteria and mollicutes: general morphological characters. Basic methods of classification and reproduction.

Viruses: nature, structure, replication and transmission. Study of phanerogamic plant parasites.

Nematodes: General morphology and reproduction, classification, symptoms and nature of damage caused by plant nematodes (*Heterodera*, *Meloidogyne*, *Anguina*, *Radopholus* etc.)

Growth and reproduction of plant pathogens. Liberation / dispersal and survival of plant pathogens. Types of parasitism and variability in plant pathogens. Pathogenesis. Role of enzymes, toxins and growth regulators in disease development. Defense mechanism in plants. Epidemiology: Factors affecting disease development. Principles and methods of plant disease management. Nature, chemical combination, classification, mode of action and formulations of fungicides and antibiotics.

Practical

Acquaintance with various laboratory equipment's and microscopy; Collection and

preservation of disease specimen; Preparation of media, isolation and Koch's postulates; General study of different structures of fungi; Study of symptoms of various plant diseases; Study of representative fungal genera; Staining and identification of plant pathogenic bacteria; Transmission of plant viruses; Study of phanerogamic plant parasites; Study of morphological features and identification of plant parasitic nematodes; Sampling and extraction of nematodes from soil and plant material; Preparation of nematode mounting; Study of fungicides and their formulations; Methods of pesticide application and their safe use; Calculation of fungicide sprays concentrations.

Text and Reference books:

1. Chaube, H.S. and Pundhir, V.S.2005. Crop Disease and Their Management.PHI Learning Pvt. Ltd.
2. Singh, R.S.2007.Plant diseases. Medtech; 10 edition.
3. Singh, R.S. 2005. 4th ed. Principles of Plant Pathology. Oxford & IBH, New Delhi.
4. Nene, Y.L. 2015. Fungicides in Plant Diseases Control. Oxford & IBH published Co. Pvt. Ltd., New Delhi.

Course Outcomes:

After completing the course, students will be able to:

1. Understand various causes/ factors affecting plant disease.
2. Understand interaction between plant and pathogen in relation to environment and time.
3. Understand about the morphology and life cycle of different plant pathogenic organisms e.g. Fungi, Bacteria etc.
4. Understand various sign and symptoms of Plant diseases.
5. Understand defense mechanism in plants (how they protect themselves from the disease).
6. Understand about the various principles and methods of plant disease management.

BAG 207: FUNDAMENTALS OF ENTOMOLOGY

Teaching Scheme	Examination Scheme
Lecture and Practical: 4 hr./ week (3+1)	Unit Test: 30 Marks
Tutorials: Nil	Practical marks: 20 Marks
Credits: 4	End Semester Exam: 50 Marks

Course Objectives:

1. To know about characteristics of class Insecta to dominate in Animal Kingdom
2. To know about morphology and physiology of Insects.
3. To explain about Environmental factors affecting insect life cycle and their infestation.
4. To give knowledge of different categories of pest and their recent methods of control.
5. To give detail account of concept, scope, practices and limitation of Integrated Pest Management

Syllabus

Theory

Part – I

History of Entomology in India. Major points related to dominance of Insecta in Animal kingdom. Classification of phylum Arthropoda upto classes. Relationship of class Insecta with other classes of Arthropoda. Morphology: Structure and functions of insect cuticle and molting. Body segmentation. Structure of Head, thorax and abdomen. Structure and modifications of insect antennae, mouth parts, legs, Wing venation, modifications and wing coupling apparatus. Structure of male and female genital organ. Metamorphosis and diapause in insects. Types of larvae and pupae. Structure and functions of digestive, circulatory, excretory, respiratory, nervous, secretory (Endocrine) and reproductive system, in insects. Types of reproduction in insects. Major sensory organs like simple and compound eyes, chemoreceptor.

Part-II

Insect Ecology: Introduction, Environment and its components. Effect of abiotic factors—temperature, moisture, humidity, rainfall, light, atmospheric pressure and air currents. Effect of biotic factors – food competition, natural and environmental resistance.

Part III

Categories of pests. Concept of IPM, Practices, scope and limitations of IPM. Classification of insecticides, toxicity of insecticides and formulations of insecticides. Chemical control importance, hazards and limitations. Recent methods of pest control, repellents, anti feed ants, hormones, attractants, gamma radiation. Insecticides Act 1968-Important provisions. Application techniques of spray fluids. Symptoms of poisoning, first aid and antidotes.

Part – IV

Systematics: Taxonomy –importance, history and development and binomial nomenclature. Definitions of Biotype, Sub-species, Species, Genus, Family and Order. Classification of class Insecta upto Orders, basic groups of present day insects with special emphasis to orders and families of Agricultural importance like Orthoptera: Acrididae,

Tettigonidae, Gryllidae, Gryllotalpidae; Dictyoptera: Mantidae, Blattidae; Odonata; Isoptera: Termitidae; Thysanoptera: Thripidae; Hemiptera: Pentatomidae, Coreidae, Cimicidae, Pyrrhocoridae, Lygaeidae, Cicadellidae, Delphacidae, Aphididae, Coccidae, Lophophidae, Aleurodidae, Pseudococcidae; Neuroptera: Chrysopidae; Lepidoptera: Pieridae, Papilionidae, Noctuidae, Sphingidae, Pyralidae, Gelechiidae, Arctiidae, Saturnidae, Bombycidae; Coleoptera: Coccinellidae, Chrysomelidae, Cerambycidae, Curculionidae, Bruchidae, Scarabaeidae; Hymenoptera: Tenthredinidae, Apidae, Trichogrammatidae, Ichneumonidae, Braconidae, Chalcididae; Diptera: Cecidomyiidae, Tachinidae, Agromyziidae, Culicidae, Muscidae, Tephritidae.

Practical

Methods of collection and preservation of insects including immature stages; External features of Grasshopper/Blister beetle; Types of insect antennae, mouthparts and legs; Wing venation, types of wings and wing coupling apparatus; Types of insect larvae and pupae; Dissection of digestive system in insects (Grasshopper); Dissection of male and female reproductive systems in insects (Grasshopper); Study of characters of orders Orthoptera, Dictyoptera, Odonata, Isoptera, Thysanoptera, Hemiptera, Lepidoptera, Neuroptera, Coleoptera, Hymenoptera, Diptera and their families of agricultural importance; Insecticides and their formulations; Pesticide appliances and their maintenance; Sampling techniques for estimation of insect population and damage.

Text and Reference books:

1. Chapman .R.F.1981. Insect Structure and Function, ELBS Publishers New Delhi.
2. [K.N. Ragumoorthi](#), [V. Balasubramani](#), [M.R. Srinivasan](#).2017. Insecta An Introduction, A.E. Publications.
3. Mathur and Upadhyay, 2005. A Text Book of Entomology, Aman Publishing House, Meerut.
4. Pant. N.C. and Ghai, S. 1981. Insect Physiology and Anatomy, ICAR, New Delhi.

Course Outcomes:

After completing the course, students will be able to:

- | |
|---|
| 1. Understand that due to the great diversity, remarkable adaptability and genetic flexibility of insects, made them dominant species on the Earth. |
| 2. Understand the characteristics of the phylum Arthropoda and class insecta. |
| 3. Able to understand economic importance of insects. |
| 4. Recognize the major taxonomic Orders of Insect and their key characteristics. |
| 5. Identify harmful insect pest and understand their morphology and physiology. |
| 6. Understand the concept, scope and limitation of IPM. |
| 7. Understand about various environmental factors affecting insects and their biology. |
| 8. Familiar about the pesticide and their use in the crops. |

BAG 208: FUNDAMENTALS OF AGRICULTURAL EXTENSION EDUCATION**Teaching Scheme**

Lecture and Practical: 3 hr./ week (2+1)

Tutorials: Nil

Credits: 3
